

CIVICS AND LAW
MONITORING COMMITTEE

Greetings friends FDA Advisory Commission,

I am Dustin Bryce representing Interest of Justice, a law and civics institute which was one of 123 organizations that spoke at the WHO public hearing on April 12, 2022 in regards to substantive elements in a new pandemic treaty. The INB recognizes us a “relevant” and “Interested” stakeholders in pandemic preparedness and response.

Again on May 13, 2022 we spoke in front of HHS OGA to beg not to use the deadly vaccines and other issues of corruption and conflicts of interest within the WHO. We have mountains of expert data to share and request you contact us if you dispute anything we say.

Our organization represents members from many other CSO’s, scientific organizations and medical experts.

This is a formal notice and demand to not approve the Pfizer and Moderna gene based vaccines in children and to cease and desist all exceptions to sanitary registration for safety reasons and fraud in the registration.

We’re very concerned because in Costa Rica this product is being mandated as soon as FDA approves for EUA in U.S.A. which is an illegal after effect of your actions.

CIVICS AND LAW
MONITORING COMMITTEE

1. In particular we are in receipt of affidavits by Dr. McCullough (most peer reviewed in his field) and Dr. Yeadon (ex VP of Pfizer, chief scientific officer). They have provided ample proof the covid gene “vaccines” are deadly to children, 20-100x increase in death. Other studies show 50x higher death risk. Doing this experiment to perform biomedical research on babies with no valid reason is outrageous. Covid is NOT a valid reason as it poses NO risk to babies and this product is very risky.

2. They are misclassified as vaccine due to reliance on the WHO’s definition of vaccine, which is a “broader” definition than the legislation of U.S., Costa Rica and all other nation states, creating a very problematic situation legally where the use of the product is actually in violation of IHR Article 3 section 1 by usurping sovereign legislation.

3. The product is a gene therapy (which Pfizer ethics committee says should not be used in trials and should only be given one time - contact us for the document) which is evident it is gene therapy by Pfizers confession in their SEC filing that the FDA defines it as a gene therapy see pg 13 *“Some of our product candidates are classified as gene therapies by the FDA and the EMA, and the FDA has indicated that our product candidates will be reviewed within its Center for Biologics Evaluation and Research, or CBER. Even though our mRNA product candidates are designed to have a different mechanism of action from gene therapies, the association of our product candidates with gene therapies could*

result in increased regulatory burdens, impair the reputation of our product candidates, or negatively impact our platform or our business”:

and also see the extra judicial confession by Bayer CEO in the World Health Summit last year see: <https://www.armstrongeconomics.com/world-news/corruption/bayer-head-admits-covid-19-vaccine-is-gene-therapy/>

4. The FDA and CDC wont write any of our experts or Senator Ron Johnson back when confronted about the risks to children and higher mortality. The FDA is covering up for Pfizer and asked to hide confidential documents evidencing a huge rate of mortality from these products.

5. The phase 4 study for Pfizer shows DEATH is the #7 outcome after 30 days. DO NOT GIVE THIS TO BABIES! see" <https://www.ehealthme.com/vs/pfizer-biontech-covid-vaccine/death/>. and see <https://www.ehealthme.com/vaccine/pfizer-biontech-covid-vaccine/side-effects/>

6. There are plenty of therapeutics available off shelf and no need for the vaccines or emergency declaration!!!

7. The unequivocal rules of science are incorporated in the legal system which requires certain studies, and approving these products for children with no benefit and all risk would be in violation of the international and U.S. legal system. This is because required scientific studies are missing, which is also in violation of international ethics norms such as Nuremberg Code and Rome Statute Article 7

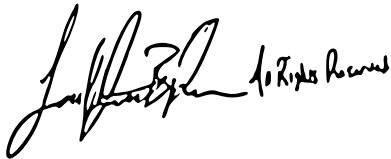

CIVICS AND LAW
MONITORING COMMITTEE

crimes against humanity if you were to approve this investigational product for babies and toddlers 6 months to 5 years:
